CERTIFICATE

Certified that the work entitled **"PLANNING, ANALYSIS AND DESIGN OF INDIRAMMA INDLU BY MANUAL PROCESS"** is a bonafied work carried out by **S.A. RAHMAN (24365A0125), ANJALI K (24365A0102), SIDDARTHA V (24365A0121), AMERSALEEM (23361A0102)** in partial fulfillment for the award of Bachelor of Engineering in civil Engineering of the **Jawaharlal Nehru Technological University, Hyderabad** during the year 2025-26. It is certified that all corrections / suggestions indicated for Internal assessment have been incorporated in the Report deposited in the department library. The project report has been approved as it satisfies the academic requirements in respect of Project work prescribed for the said Degree.

Guide : Head of the Department

ACKNOWLEDGEMENT

There are many people instrumental for the successful completion of this dissertation work. First, we owe thanks to Almighty, my parents my deepest gratitude, as nothing would have been possible without their constant support and encouragement.

The heights reached by the great men did not come in a single fight, but they, on their way stepped on successes crossing all the stones of failures. Accordingly, we now take up this privilege of remembering with gratitude those people behind the success of my project, which really pushed me across the stones of failure.

As APJ Abdul Kalam sir has said, “A good teacher explains, a better teacher demonstrates but the best teacher inspires”, this is how my guide Asst. Prof. **Mr.SK. SHANAVAZ AHMED** sir guided us through our project work. We would like to thank him for permitting us to undertake the dissertation work under his able guidance, for his / her very useful suggestions, support and guidance. They have been pillars of strength, and their presence has inspired me to do all the better and there aren’t enough words to describe it.

We would be failing in my duty if we don’t thank our beloved **HOD Mr**. **SK. SHANAVAZ AHMED** sir and our **Principal, Mr. P Krishnamurthy** sir for their constant encouragement and resolve. Lastly, we would like to thank our beloved Chairman sir **Mr. K S Ravi Kumar** sir for providing all the necessities for completion of my thesis.

We also take this opportunity in expressing my gratitude and respect to my project Coordinator Asst prof Mr. **Ravi Kumar** sir for his cooperation and support in all aspects.

We finally take this opportunity in expressing my gratitude and respect to all my department faculty, those who have directly and indirectly helped and encouraged me during this project.

DECLARATION

We, **S.A. RAHMAN (24365A0125), ANJALI K (24365A0102), SIDDARTHA V (24365A0121), AMERSALEEM (23361A0102)** students of 3th year B.Tech in Civil Engineering, JAYAPRAKASH NARAYAN COLLEGE OF ENGINEERING, hereby declare that under the supervision of our guide **Asst. Prof. SK. SHANAVAZ AHMED** sir of civil Dept., JAYAPRAKASH NARAYAN COLLEGE OF ENGINEERING, have independently carried out the project titled **"PLANNING, ANALYSIS AND DESIGN OF INDIRAMMA INDLU BY MANUAL PROCESS"** and submitted it in partial fulfillment of the requirement for the award of degree of Bachelor of Engineering in Civil Engineering by the Jawaharlal Nehru Technological University, Hyderabad during the academic year 2025-26.

S.A. RAHMAN (24365A0125)
ANJALI K (24365A0102)

AMERSALEEM (23361A0102)

Date:
Place: Mahabubnagar.

ABSTRACT

In today's economic climate for many families, the dream of constructing a safe, permanent home is blocked by high costs and technical difficulties. To help overcome this, the Telangana Government launched the 'Indiramma Indlu' scheme, providing a ₹5,00,000 subsidy to help citizens build their own houses. However, having the funds is only the first step; beneficiaries still need proper engineering to ensure their homes are safe, affordable, and well-planned.

This project brings that government initiative to life for a real beneficiary, **Smt. B. Kanakamma**. Our goal is to take the technical stress out of the construction process by providing a complete, ready-touse house plan that strictly follows the National Building Code and specific government guidelines.

We tackled this in two practical steps. First, we focused on the architecture: giving the house its shape, allocating rooms, setting exact dimensions, and placing columns within a tight 590 sq ft space so it functions as a comfortable home. Second, we took those drawings and performed a full structural analysis. By manually designing the concrete Columns, beams, and Slabs, we ensured that the house is not just economical to build, but physically strong enough to last a lifetime. Ultimately, this project is about using civil engineering to turn a government subsidy into a safe, permanent reality for a family.

Keywords: Indiramma Indlu Scheme, Beneficiary, National Building Codes, Government guideline, Architecture, Comfortable home, Structural Analysis.
